WHO ARE WE?

Imperitek is a partnership-driven manufacturer delivering premium liquid-applied membranes for **roofing, waterproofing, and surfacing**, with unmatched performance in the North American market.

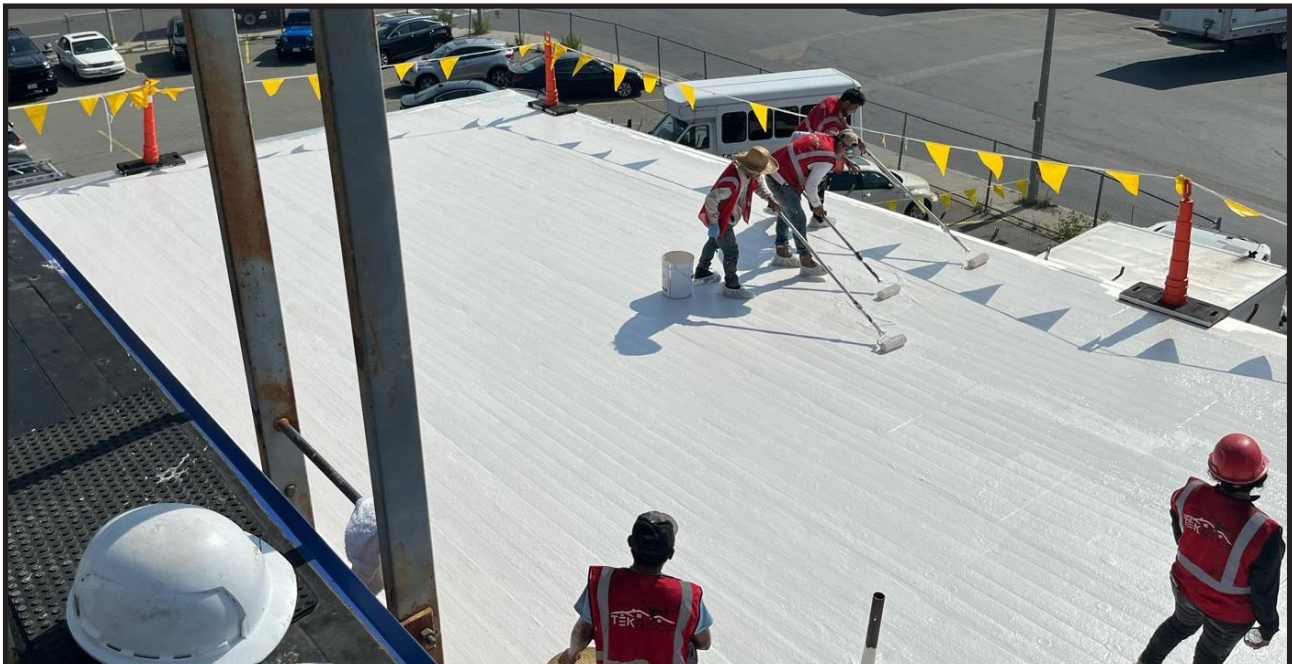

Our seamless systems are built on advanced technologies and are engineered to seal, protect, and extend the lifespan of virtually any structure, whether they are overlaid or applied to new construction.

At Imperitek, we believe success is driven not only by superior product

performance, but also by the strength of the relationships we build along the way. We are especially proud of the network we have developed in our short lifespan. From our partners and dealers to contractors and clients, Imperitek has built its brand on collaboration, responsive support, and mutual trust — before, during, and after each project is complete.

Our vision is to become the leading name in seamless waterproofing across North America, recognized for innovation, reliability, and an unwavering commitment to building resilient structures and lasting partnerships.

"Built on Trust; Powered by Innovation; Stronger Together"

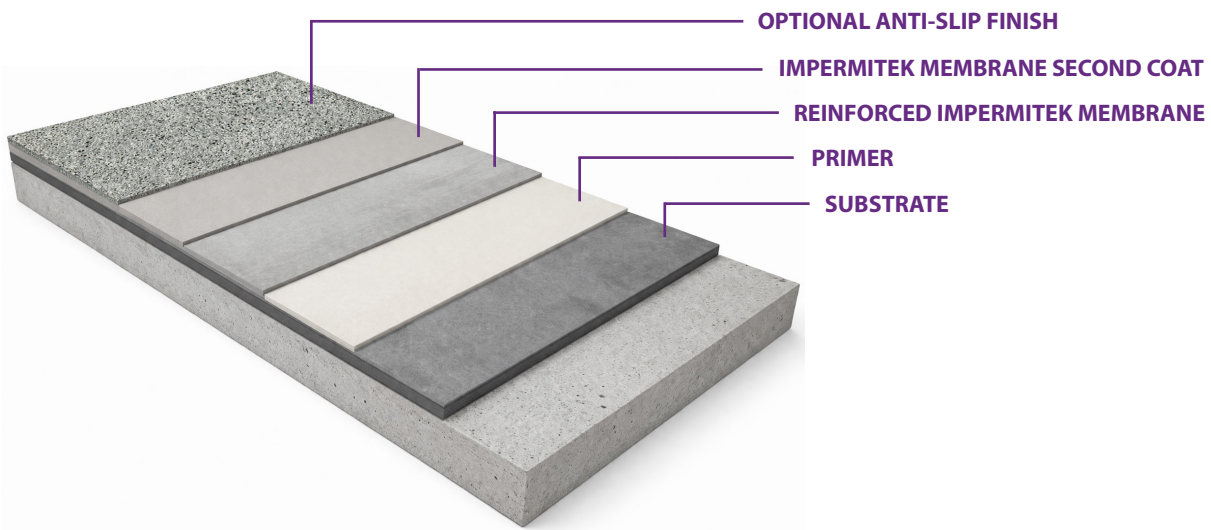

LOW SLOPE ROOFING

Impermitek's liquid-applied membranes form a continuous, joint-free barrier that removes seams, overlaps, and vulnerable points. Engineered with durable waterproof and impact-resistant finishes, Impermitek effectively shields flat-roofs from harsh weather and environmental stress, regardless of how intricate their design may be.

Because we understand the major investment behind a roofing project, we work closely with our clients to ensure the roofing specification is tailored precisely to their needs. Whether used to restore an existing roof or incorporated into a brand-new roofing design, Impermitek provides dependable and long-lasting protection.

WATERPROOFING SOLUTIONS

Impermitek's liquid-applied membranes are fully resistant to prolonged water exposure, making them a trusted solution for a range of waterproofing applications such as fountains, pools, containment systems and water features.

Impermitek's systems form a flexible — yet resilient — barrier that prevents water intrusion across the entire surface, no matter the shape or design of your structure.

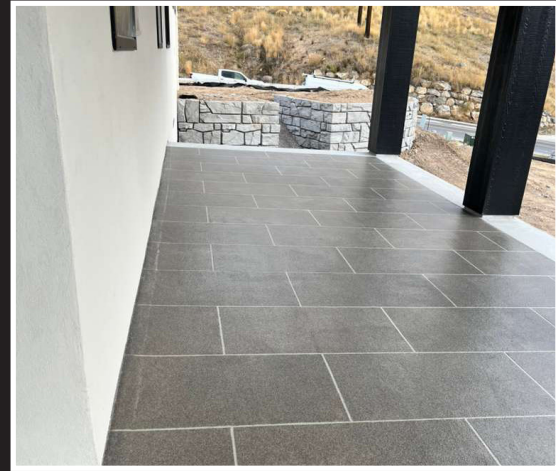

With a variety of colors and finish options, Impermitek doesn't just protect — it enhances. Backed by proven performance, long-term durability, and comprehensive warranties, there is no better choice for your waterproofing needs.

DECKS & BALCONIES

Impermitek's membranes are ideal for surfacing decks, balconies, and terraces. Suitable for both new builds and refurbishment projects, they deliver an attractive, low-maintenance result.

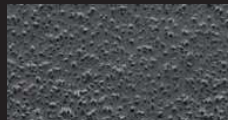

While ImpermiGrip offers a convenient single-step, anti-slip finish with built-in aggregate, additional slip resistance and cosmetic options can be achieved using ImpermiFinish, enhancing both safety and visual appeal.

VERSATILE SOLUTIONS

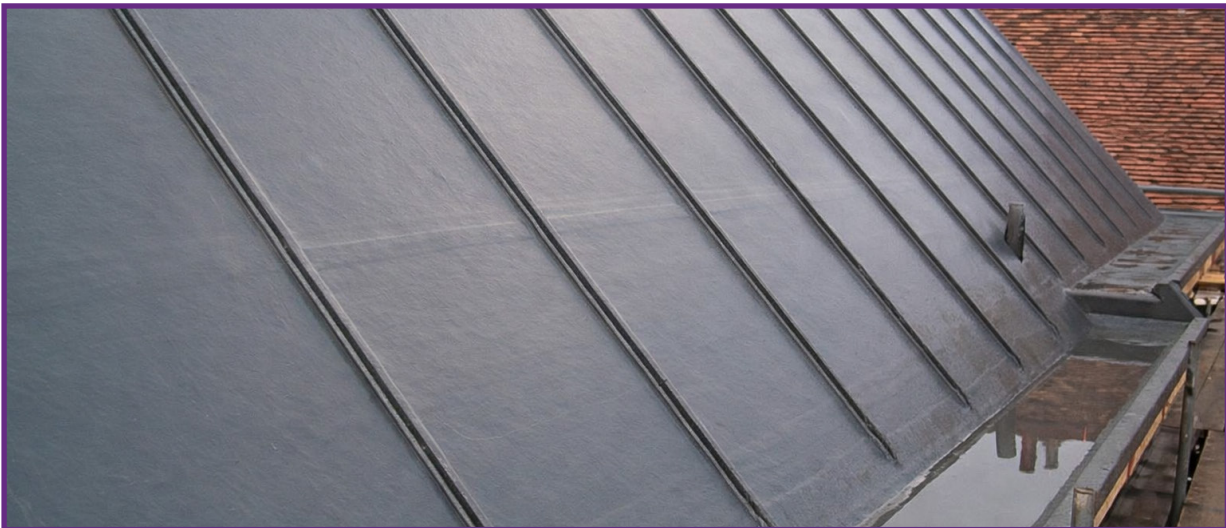

GREEN ROOFS

Impermitek meets the unique demands of green roofing systems as our membranes are inherently inorganic and root resistant, remaining completely impervious to rot and biological degradation. Their flexibility allows for structural movement, while their lightweight — yet robust — composition ensures long-term durability.

SIMULATED METAL FINISHES

Impermitek's membrane systems can recreate the look of a standing seam metal roof using custom-designed pre-formed GRP trims. The result is a lightweight, fully seamless, and more cost-effective alternative to conventional metal roofing — without sacrificing the visual appeal or performance.

SURFACING APPLICATIONS

From clean, modern finishes to highly textured, heavy-duty applications, we offer a wide range of customizable surface options to meet virtually any design vision or requirements for:

- Parking garage protective coating and waterproofing
- Mechanical rooms and other interiors
- Safety walkways and access areas
- Concrete protection solutions, including sidewalks, driveways and patios
- Cycle lanes and other road markings

For projects requiring greater design flexibility, our waterproofing membranes can be seamlessly integrated with traditional decking, tile, or other finish systems—giving you complete control over the final look without sacrificing performance.

Whether in residential, commercial, or industrial applications, our surfacing solutions perform in any environment, providing safe, attractive, and long-lasting results.

Contact our technical team today to find out how we can provide the best solution for your project!

WHY CHOOSE US?

Impermitek is designed to outperform and outlast conventional solutions, delivering:

- Reliable protection from water intrusion and environmental elements
- Tough and impact-resistant finish that can easily accommodate foot or vehicle traffic
- Seamless application that eliminates the vulnerability associated with lap joints and welds
- High resistance to algae, soil/water additives, fertilizers, organic acids and alkalis
- Fast curing technology for quick disruption-free installations
- Cold application — no flames, no hot works, no fire risk
- High versatility offering solutions to a wide range of structures, including existing roof coverings and direct substrates
- High flexibility, durability, and maintenance-free
- Lightweight membranes that enable greater design freedom
- Technical support from qualified professionals who ensure projects run smoothly and achieve successful outcomes
- Performance guarantee with warranty coverages of up to 25 years
